

To Whom it may concern,

Weatherskin initially came to site to look at our low sloping metal pitched roof on our packaging hall which had been patched for several years in an attempt to stop the leaks. They were incredibly knowledgeable regarding the problems with this type of roof and recommended their 5-layer seam on the 650 seams and 2 coat cover of the 75,000 sqft roof along with a rubberized product to seal the complete gutters. Their work was exceptional, and they were incredibly professional from start to finish, the project was completed on time and to budget.

They demonstrated their professionalism and were true to their word when after a serious down pour we had a slight leak on the roof and Weatherskin were on site within the hour, they then spent the next day locating and resealing the source of the leak. We were so pleased with the product and service that Weatherskin provided that we had our brewhouse covered with the same system later in the year.

I would highly recommend Weatherskin's product and the services they provide and would like to thank them for all their hard work.

Yours Sincerely

Mark Barlow
Maintenance Manager
